Sequence 22, Application US/08134198E

Patent No. 6190885

GENERAL INFORMATION

APPLICANT: OF CONTRA COSTA

APPLICANT: PETERSON, DERRY A.

APPLICANT: PETERSON, DERRY A.

TITLE OF INFORMENCES: 42

CORRESPONDENCES: 42

CORRESPONDENCES: Pretty, Schroeder & Poplawski

STREET: 444 South Flower Street, Suite 1900

CITY: Los Angeles

STATE: California

COUNTRY: USA
APPLICANT: OF CONTRA COSTA
APPLICANT: PETERSON, JERRY A.
APPLICANT: LAROCCA, DAVID J.
TITLE OF INVENTION: FUSION PROTEIN CONTAINING HMFG
NUMBER OF SEQUENCES: 42
CORRESPONDENCE ADDRESS:
ADDRESSEE: Pretty, Schroeder & Poplawski
STREET: 444 South Flower Street, Suite 1900
CITY: Los Angeles
STREET: Galifornia
COUNTRY: USA
ZIP: 90071
COMPUTER REABBLE FORM:
MEDIUM TYPE: 3.5" Floppy disk
                                                                                                                                                                                                                                                                                                                                                                                         COMPOURE: 1BM PC compatible
COMPOURE: 1BM PC compatible
COMPTARE: 1BM PC compatible
CONTRARE: PatentIn Release #1.0,
SOFTWARE: Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/134,198E
FILING DATE: October 8, 1993
CLASSIFICATION: 530
ATTORNEY/AGENT INFORMATION:
NAME: Amcel, Viviana

Patent No. 575666

Patent No. 575666

Patent No. 575666

GENERAL INFORMATION:

APPLICANT: MASAFUMI, TAKIGUCHI
APPLICANT: MIWA, KIYOSHI

TITLE OF INVENTION: DEPTILES CAPABLE OF INDUCING IMMUNE
TITLE OF INVENTION: CURING AIDS

NUMBER OF SEQUENCES: 115

CORRESPONDENCE ADDRESS: 115

ADDRESSEE: OBLON, SPIVAK, MCCLELLAND, MAIER & NEUSTADT,
ADDRESSEE: P.C.

STREET: 1755 S. JEFFERSON DAVIS HIGHWAY, SUITE 400

CITY: ARLINGTON

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          A26744

A26744

Bradykinin-like peptide - garden dagger wasp
NyAlternate names: Thr-6-bradykinin
C;Species: Megascolia flavifrons (garden dagger wasp)
C;Species: Megascolia flavifrons (garden dagger wasp)
C;Date: 08-Mar-1889 #sequence_revision 08-Mar-1989 #text_change 05-Oct-2004
C;Accession: A26744
R;Yasuhara, T: Mantel, P.; Nakajima, T.; Piek, T.
Toxicon 25, 527-535, 1987
A;Title: Two kinins isolated from an extract of the venom reservoirs of the solitary was A;Accession: A2674
A;Accession: A2674
A;Accession: A2674
A;Molecule type: protein
A;Residues: 1-9 < YAS.
